

Philips living white plug is not exported to Apple Home

ghost-ps

Feb 20

Unfortunately, the Philips living white plug is no longer exported to Apple Home with Matter.

Environment:

Philips hue Bridge BSB002

Firmware 1.56.1956178030

Living Whites Plug LWLOO1

Firmware 0.1.4591

Hue_Developer_Support 

Feb 21

Officially we do not support this product as being a non-Hue product.

Thanks for the feedback, unfortunately not the response I was hoping for. I find it a pity, because with the previous Matter beta firmware the Philips LW plug was still supported! Why are my other non-Hue products now supported in Apple Home and these Philips Zigbee products are not?
